Blue Hill Data Services (Blue Hill) provides critical, high-availability virtualized, hosted and private cloud services for open/distributed systems to organizations of all sizes and in all verticals. Working closely with each client to understand their particular business needs and compliance requirements, Blue Hill delivers private cloud solutions that protect companies from costly downtime and eliminate the risk of data loss.

Blue Hill's solutions are fully customizable, meeting the budgetary and efficiency needs of our clients today, while offering them the flexibility needed to scale operations in response to future growth or changes in their environment.

What We Offer

- Private, hybrid and public cloud support
- Server virtualization and consolidation
- Citrix environment
- Redundant, secure and highly available data center environment
- Fully managed hosting
- Systems and network management
- Tape or disk backup
- Replication and storage
- Dedicated Disaster Recovery
- Virtual Desktop Infrastructure

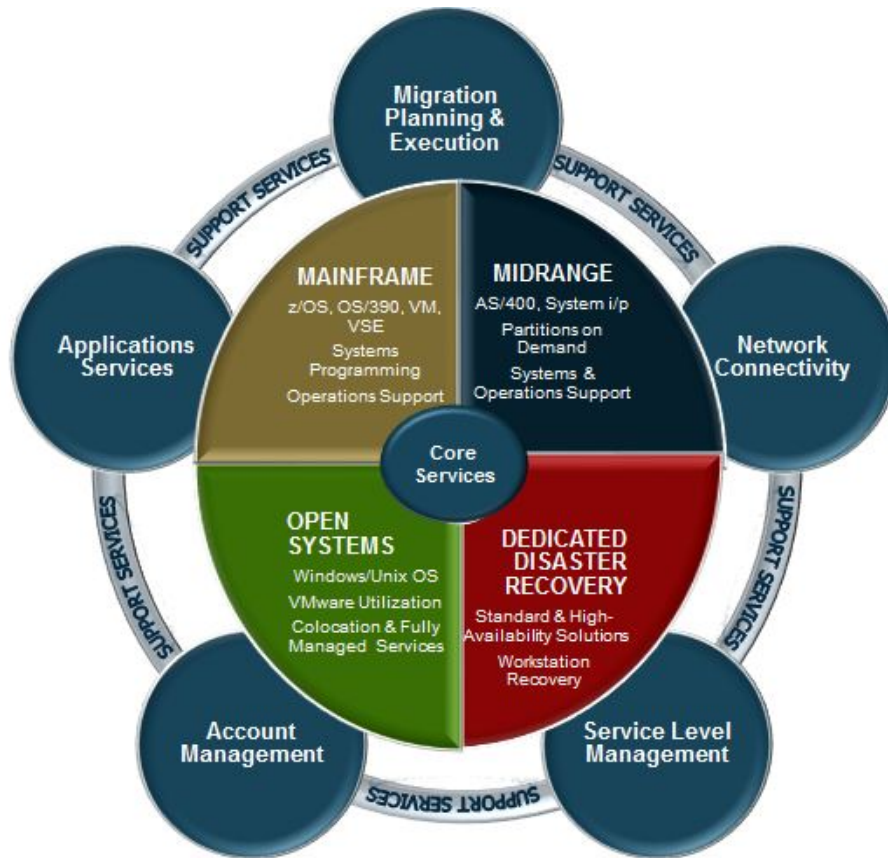

The Benefits of a Blue Hill Solution

Blue Hill's differentiation is that we are the only IT infrastructure, cloud and managed services provider in the northeast whose expertise crosses all platforms (mainframe, mid-range, open/distributed systems). Among the benefits that accrue to Blue Hill Data Services clients are:

- A shift in expenses from CAPEX to OPEX
- A reduction in total cost of ownership (TCO)
- Fixed pricing for better budget management
- Customer-centric service
- 24/7 on-site support
- Single point of contact for issue resolution
- Vendor management
- Expertise across all platforms
- Fully customized solutions; never one-size fits all

Committed to Satisfaction

Blue Hill Data Services is committed to helping clients **reduce their operating costs** and **minimize risk** by providing fully managed data center solutions. World-class **onshore facilities**, highly skilled and experienced staff, and reliable 24/365 services support the IT needs of clients worldwide. We customize SLAs and contracts to fit your standards; we don't force you to fit ours. In return for that dedication, we enjoy **100% client retention**.

Blue Hill's state-of-the-art 'Class A' data centers offer environmental redundancies and secure network infrastructure, as well as high-level data security provisions. In support of customer Sarbanes-Oxley, HIPAA, and Payment Card Industry (PCI) requirements, Blue Hill compliances include Type 2 SOC 1 (also known as SSAE16, formerly SAS 70) compliance, PCI-DSS compliant and EU Safe Harbor Security Certification — evidence that our operational processes and controls meet superior standards of security, reliability and availability.
