

News Release

Blue Hill Participates at TAG's "2015 Cyber Attack & Business Continuity Simulation"

May 1, 2015

The TAG Information Security Society, an organization within TAG (Technology Association of Georgia), is hosting The 2015 Cyber Attack & Business Continuity Simulation session on May 5th from 9am – 5pm at Southern Polytechnic State University, 1100 South Marietta Parkway, Marietta, GA 30060.

Mock cyber attackers will challenge the skill and resolve of the C-Level, Senior Management and Practitioner Dream Team of a Big Utility Company and its Water, Electric and Gas subsidiaries in three one-hour attack simulations. Participants will be able to interact with the simulation role players via Tweets, texts and emails. Watch and learn in a risk-free simulation environment as TLC's Dream Team of C-Level executives, senior manager and practitioners from a variety of disciplines apply best practices to respond to the attacks.

Paul Franchak, Senior Business Development Executive at Blue Hill Data Services™ from Atlanta, actively supports TAG's efforts as a member of the Operational Resilience board.

"We are excited that customers can get a look behind the scenes and understand how hackers attack organizations, and learn ways to respond to a variety of cyberattacks that could plague your organization, too. As always, this will certainly be a great learning experience, and we are happy to be supporting this great organization..." Paul Franchak, Senior Business Development Executive, Blue Hill Data Services-TM

Information Security Society

Information Security Society's mission is to provide a leadership forum focused on education and collaborative sharing of today's information security, privacy, risk management and compliance related issues. Keeping you informed, allowing community collaboration and facilitating an open exchange. The society is positioned well for business and technology professionals interested or actively working in the field of information security, privacy, risk or compliance. If you have an interest in learning and exchanging information on how and why integrating information security in your business then you should attend.

About The Technology Association of Georgia (TAG)

The Technology Association of Georgia (TAG) is the leading technology industry association in Georgia, serving more than 26,000 members and hosting over 200 events each year. TAG serves as an umbrella organization for 34 industry societies, each of which provides rich content for TAG constituents. TAG's mission is to educate, promote, influence and unite Georgia's technology community to foster an innovative and connected

marketplace that stimulates and enhances a tech-based economy. The association provides members with access to networking and educational programs; recognizes and promotes Georgia's technology leaders and companies; and advocates for legislative action that enhances the state's economic climate for technology. Additionally, the TAG Education Collaborative (TAG's charitable arm) focuses on helping science, technology, engineering and math (STEM) education initiatives thrive.
