Blue Hill Data Services™ showcases services at Disaster Recovery Journal's 51st Annual Fall World Event

September 8, 2014

The “storm gone wild” or unexpected cyber-attacks can be devastating and, unfortunately, these incidents are becoming all the more frequent. Blue Hill Data Services™ and RES-Q™, a division of Corus360, participated in Disaster Recovery Journal's 51st Annual Fall World in San Diego, California September 7-10. Disaster Recovery Journal's well-attended event gave Blue Hill Data Services and RES-Q™ the opportunity to provide an overview of how other companies are using services to protect their most valuable asset: the ability to conduct “business as usual” under the most extreme circumstances.

“We were thrilled to once again be a sponsor at Disaster Recovery Journal's Fall World Event. This forum provides timely updates of the latest technology solutions, giving businesses the ability to experience firsthand the services available to meet their growing needs,” says Steve Gruber, Vice President of RES-Q. “As the level of sophistication and expectations grow, so do the service opportunities within our industry. We find it important to stay abreast of what our customers expect, and understand the latest trends.”

In addition to meeting hundreds of prospective businesses, the three-day event allowed service providers to meet customers face-to-face, and in a “Skype” world, there's nothing like having real time contact and conversation.

“This was a real opportunity to network with the best in our industry and to connect with a diverse group of individuals and organizations,” says Rosary Di Filippis, Executive Director, Business Development and Chief Marketing Officer. “As an ‘on-shore’ ITO (Information Technology Outsourcing) provider, we have the opportunity to introduce companies to the benefits of working with a full-service solution center that's truly ‘Made in America.’ Our 100 percent client retention speaks to the trust and confidence we have built over the past 20 years.”

About Corus360/RES-Q

RES-Q™ Services of Atlanta, a division of CORUS 360, a proud partner of Blue Hill Data Services™/CAPS, specializes in providing resiliency, recovery, and testing solutions, and delivers the full-range of business continuity services. Through innovative solutions, we help organizations create, implement, and maintain resiliency and recoverability of their

infrastructure. Our expertise helps organizations reduce recovery time, improve data, and increase system availability to minimize the impact to your business while driving down costs. We specialize in blended, cost-effective solutions centered on superior customer service and support. What truly sets us apart is our dedication to a holistic view of disaster recovery – while the recovery process involves system and data, it begins and ends with people who understand your requirements.
